

What is hepatitis B?

Hepatitis B is a virus.
You can get it through
unsafe sex

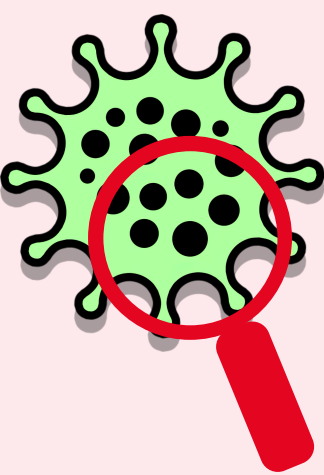

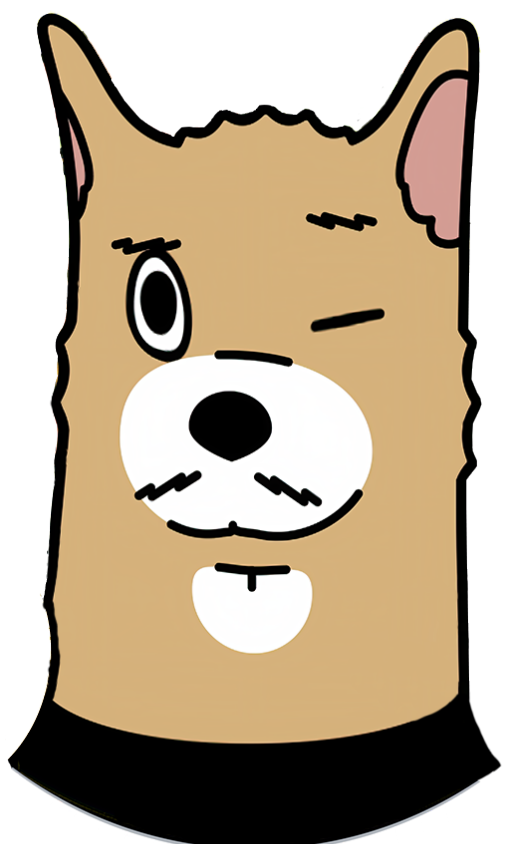

You get it through
unsafe vaginal, anal
and oral sex

And you get it through
used hypodermic needles

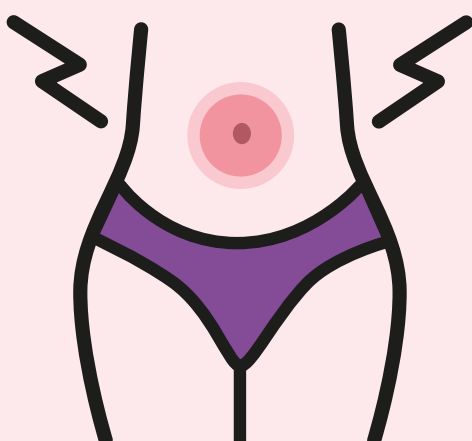

How do you recognize hepatitis B?

You don't have to feel sick

If you do get sick,
you are very tired

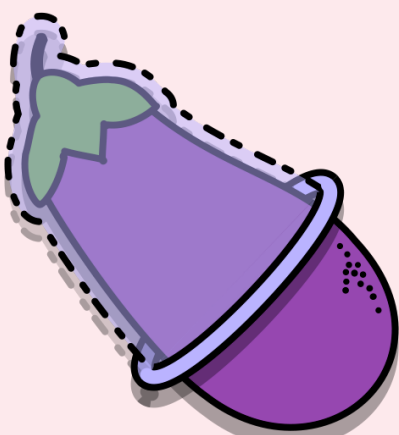

You have a stomach ache

You have a fever.
You feel really sick

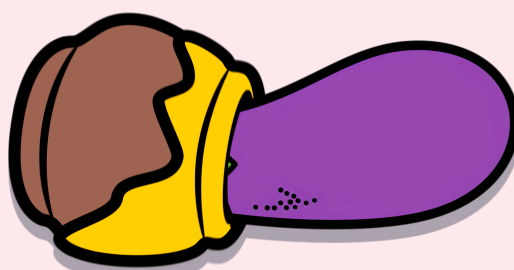

How can you prevent hepatitis B?

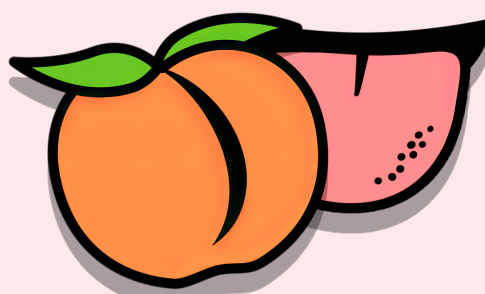

Always use a condom

With anal sex

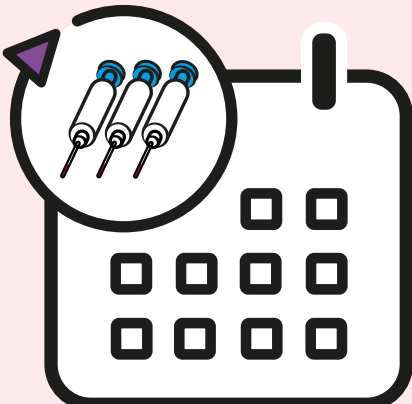

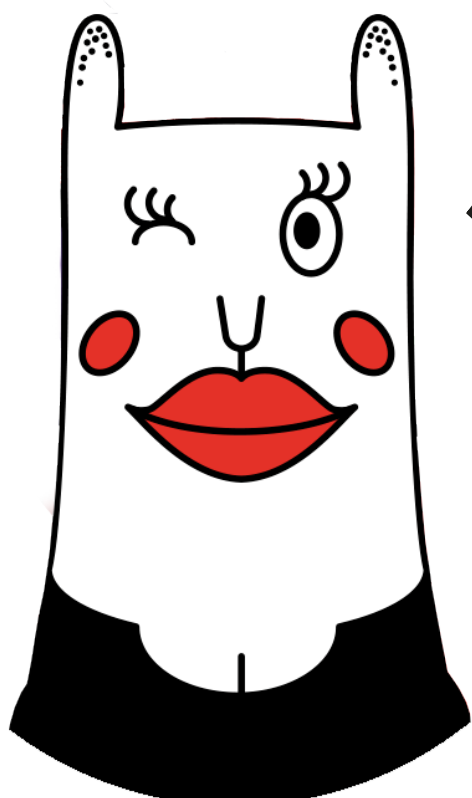

With vaginal sex

And oral sex

How does vaccination work?

You will receive three injections
within six months

It's free of charge

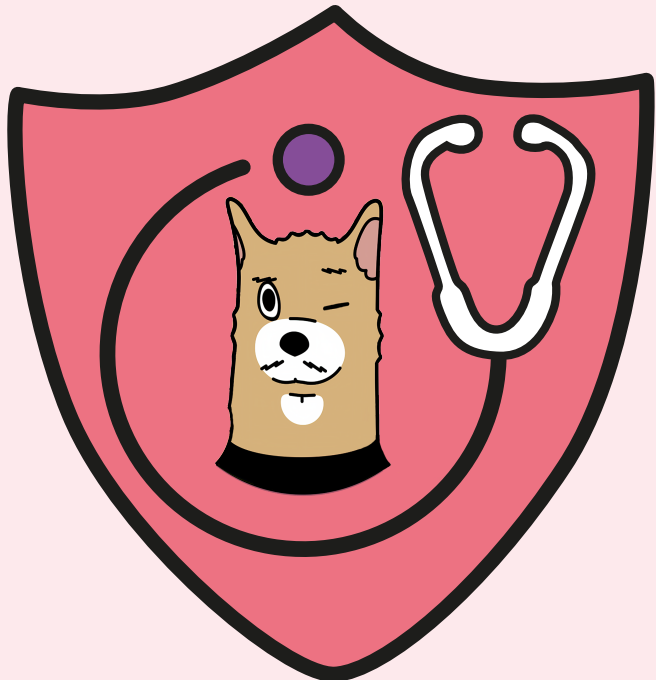

You can make an
appointment online at
the GGD in your area

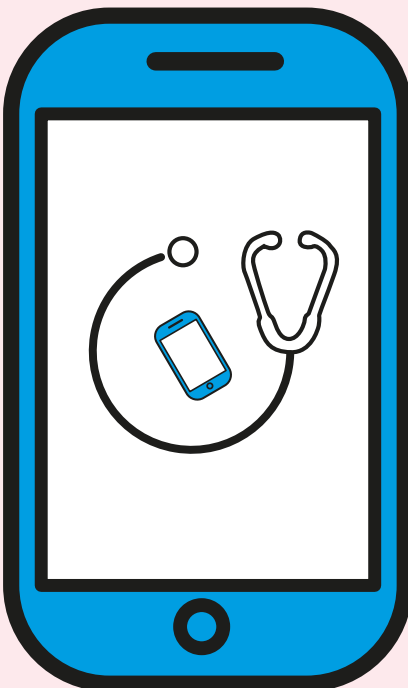

itsyourliver.nl

More information about hepatitis B

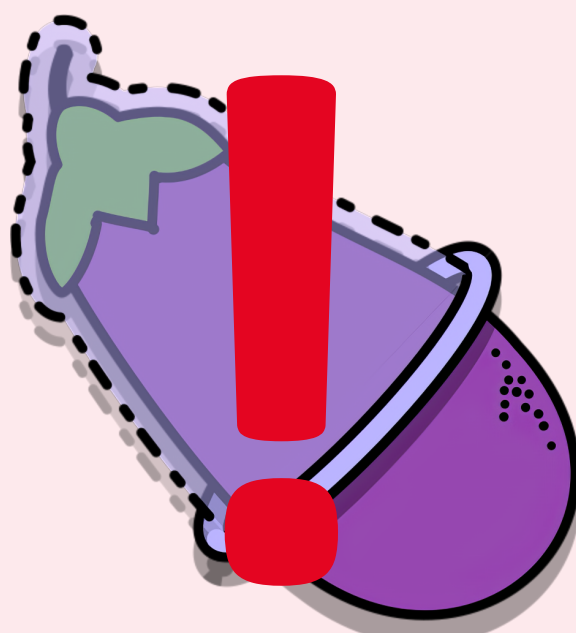

Do you have symptoms that are
consistent with hepatitis B?

Protect yourself well

Call your doctor or the GGD
for an appointment
