

WHAT IS HEPATITIS B?

Hepatitis B is a virus.

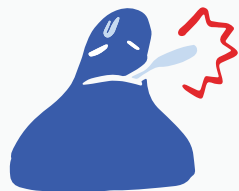

You can get it through contact with a client's blood, sperm, pre-cum or vaginal fluid.

WHAT ARE THE SYMPTOMS OF HEPATITIS B?

You don't have to feel sick. But you might.

You can be tired

Have a fever

Feel nauseous

Or have stomach pain

Sometimes your eyes and skin turn yellow

HOW DO YOU PREVENT HEPATITIS B?

A condom works well.

GET THE FREE VACCINATION

Make an appointment online at a local municipal health service (GGD). You receive 3 shots in 6 months. You can never get hepatitis B.

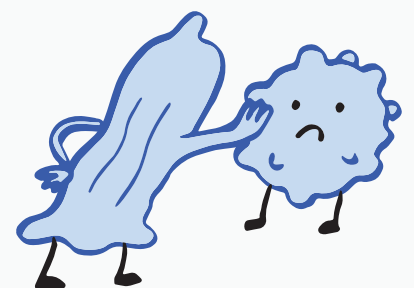

During anal sex.

During vaginal sex.

During oral sex.

DO YOU THINK YOU HAVE HEPATITIS B?

You can get an STI test at your doctor or the GGD. This is free at the GGD if you earn money from sex. If possible: take a break from work. If you use a condom, you will not give it to anyone else.
